

**Municipality of Leamington
Notice of Study Commencement
Municipal Class Environmental Assessment
Pump Station #200**

The Municipality of Leamington has retained the services RC Spencer Associates Inc. to complete the Class Environmental Assessment (EA) for the relocation and upgrading of the existing sanitary sewage Pump Station No. 200 located on Robson Road at Bruce Avenue in the Municipality of Leamington. The relocation and upgrading is being evaluated due to the need for renewal of the existing pump station infrastructure.

The purpose of the Class EA is to assess the viability of expanding the capacity of the existing pump station and to identify a preferred location for the renewed pump station infrastructure, if required. This project is being completed under the planning and design process for a Schedule B project as outlined in the Municipal Engineers Association's *Municipal Class Environmental Assessment*.

The Class EA process involves the collection and integration of input through consultation. The major components of the study include:

- Evaluation of the existing pumping station for increasing its hydraulic capacity
- Identification of relocation options and corresponding buried infrastructure improvements and modifications
- Evaluation and selection of the preferred options based on consultation
- Completion of an impact assessment and identification of mitigation measures for consideration during the design phase
- Documentation of the study process and recommendations by way of a Project File. The file will be made available for public review and comments at the end of the study.

PUBLIC COMMENTS ARE INVITED

The Municipality of Leamington wants anyone with an interest in the study to have an opportunity to provide input which will help the project team in the decision-making process. There is opportunity at any time during this study for interested persons to review outstanding issues, provide comments, questions and bring concerns to the attention of the project team.

Project updates will be available on the Municipality's website: www.learmington.ca/projects throughout the study.

Information collected for the study will be used in accordance with the *Municipal Freedom of Information and Protection of Privacy Act*. With the exception of personal information, all comments will become part of the public record and included in the project documentation.
