Subject: Archeological Study for the Southwest Storm Water Management Pond

Dear Resident/Homeowner,

The Municipality along with its Consultant Dillon Consulting are required to conduct an Archeological Study of the properties shown on figure 1. The study must be completed prior to commencing construction of the Stormwater Management Pond and Outlet in the Late Summer early Fall of 2022.

Members from Dillon Consulting will attend your property to review and take some small samples of the soil. The majority of testing will be in the Municipal Right of Way but there may be the need to sampling on private property. The Study is scheduled for Mid-May 2022 and should be completed within a couple days. There will be no need to enter into your homes

The Municipality of Leamington sincerely appreciates your cooperation throughout this project. We ask for your continued cooperation and should you have any questions, please do not hesitate to contact the undersigned at 519-326-5761, ext. 1369

Should you have any other questions or concerns feel free to contact the undersigned.

Regards,

Alexander N. Del Brocco, C.E.T.
