

Southwest Leamington Storm Water Management Environmental Assessment and Design

Notice of Public Information Centre

The Municipality of Leamington has retained Dillon Consulting Limited to undertake a study to improve municipal drainage infrastructure in Southwest Leamington to support development in the area. The study is considering current drainage challenges, upgrades required and new infrastructure. A combined sanitary and stormwater sewer currently collects both household sewage and rainfall runoff within the existing developed area. This study is also evaluating the potential to separate the sewers, which has a number of environmental and cost benefits.

Public consultation is important to the success of the study. A Public Information Centre (PIC) is being held to provide stakeholders and the public an opportunity to obtain background information, meet the project team, and provide feedback. The PIC will be held as follows:

Date: Wednesday, February 26, 2020

Time: 4:00 PM to 7:00 PM
(Drop in/Open House format)

Location: Leamington Kinsmen
Recreation Complex
249 Sherk Street
Leamington, Ontario

The study is following the requirements of the Municipal Class Environmental Assessment (EA) (2000, as amended in 2015) process for a Schedule B activity. A report documenting the process will be available for review at the end of the study.

Key Map

For further information, or to be added to the study mailing list, please contact the study team at southwestleamington@dillon.ca or visit the Municipality's website throughout the study for project updates: www.leamington.ca/southwestleamington

Information collected will be used in accordance with the *Municipal Freedom of Information and Protection of Privacy Act, R.S.O. 1990, c. M.56*. With the exception of personal information, all comments will become part of the public record.
